# Networking Consulting Services

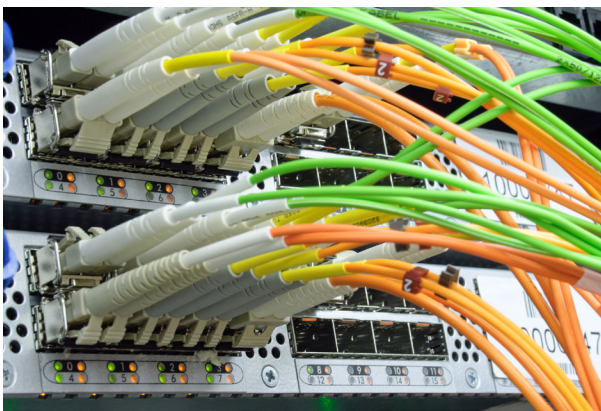

Utilizing C2 Company to *design and implement a LAN, WAN or remote access network*, our customers have come to trust and rely on our certified professionals for their most critical IT projects.

By leveraging the vast skill set, and real world experience, of our engineers, C2 Company provides our customers with *secure, robust, reliable and scalable designs* that support our customer's requirements and business objectives which help them to:

- Integrate seamlessly across all new and existing network components
- Minimize costly downtime and lower overall costs
- Maximize network capacity and availability
- Securely Converge data, voice and video
- Embrace emerging technologies
- Leverage routing and switching to balance loads for maximum throughput and availability
- WAN optimization to conserve bandwidth and increase speed
- Scale with changing business needs

C2 Company *does not resell hardware*, instead we leverage the technology our customers have in place, or evaluate and recommend leading-edge technology that meets their specific goals. Hardware sales never cloud our judgment and our fiduciary responsibility is to our customers.

## Why Choose C2 Company?

C2 Company has *over 20 years experience* in building and troubleshooting networks and are experts in network security. Our team of *certified experts* have designed, built and managed thousands of complex networks.
